Electrical Safety

Here are 10 electrical safety hazards to keep an eye on in the workplace:

Have all electrical work done by a qualified electrician.

- Overloaded circuits
- Faulty wiring
- Exposed electrical parts
- Improper grounding
- Damaged insulation
- Contact with live wiring
- Loose connections
- Wet environments
- Overhead power lines

Bee Safe

- Damaged electrical tools and equipment

Check electrical cords to make sure they are not running across doorways or under carpets. Extension cords are intended for temporary use.

Only use one heat-producing appliance (such as a coffee maker, toaster, space heater, etc.)

plugged into a receptacle outlet at a time.

Major appliances (refrigerators, dryers, washers, stoves, etc.) should be plugged directly in a wall receptacle outlet. Extensions cords and plug strips should not be used.
