CHEMICAL SAFETY

What are the risks of improper chemical handling and storage?

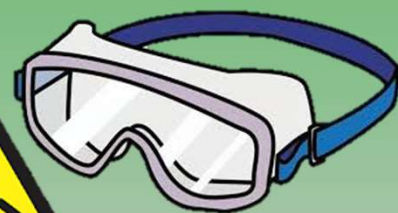

Improper chemical handling and storage include accidental exposures, toxic inhalation, fires, and environmental contamination, which can lead to health hazards, property damage, and regulatory consequences.

Globally more than 2 million deaths were due to chemicals in 2019
-World Health Organization

How to reduce your risk:

- Get special instructions before use; review the SDS!
- Do not handle until all safety precautions have been read and understood.
- Keep away from heat/sparks/open flames/hot surfaces.
- Use personal protective equipment as required; Wear protective gloves/protective clothing/eye protection/face protection.
- Know explosion risk in case of fire.

Eliminate unnecessary chemicals or substitute with **Bee Safe** equally effective and less toxic chemicals
